Door Check Link Reinforcement Base Plate

Over time, the door check link assembly on Jaguar XJ6, XJ8 and XJ12 models may become loose or break resulting in a door with noisy operation, irregular travel and one that won't stay open when entering or exiting the vehicle. If your door exhibits any of these symptoms, installing a new door check will not fix the problem. Blackdog Manufacturing's Door Check Link Reinforcement Plate is the solution!

Product Description

Precision cut and predrilled 1/8" mild steel plate designed to reinforce a weakened sheet metal mounting point. It will restore a quiet and solid feel to door travel, and will hold the door open when entering or exiting the vehicle. The reinforcement plate is not just a solution to a problem. It can prevent the problem. Check your doors and if one of them is even slightly noisier we recommend installing this product.

Features & Benefits

- Reinforces fatigued sheet metal mounting point
- Inexpensive alternative to costly body shop repair
- Restores a smooth & quiet operation to door travel
- Holds door open for easy entry and exit

Part# & Application

GMD1983AB.PLATE - XJ6 1993-1997 | XJ8 1998-2003 | XJ12 1993-1996
