

Jaguar S-Type Lower Ball Joint

Tired of having the dealer tell you that the only way to get this part is to purchase the assembly? We say if all you need is that part, then that part should be available. We give you the S-type ball joint, only sold as an assembly by all dealerships, sold individually by us.

Product Description

This is the lower ball joint that is located on the vertical link on the front end of the vehicle. Replace those worn out ball joints without having to buy the entire assembly. In case your vertical link is damaged, you can save money by purchasing our assembly.

Features & Benefits

- Meet or exceed Jaguar Specifications
- Less expensive than purchasing entire assembly
- Simple Installation
- In-stock and ready to ship

Part# & Application

XR81814/81815A - S-Type 3.0/4.0 2000-2003: *located on the front vertical link*
