

## Land Rover Aluminum Water Pump Pulley Upgrade

For reasons unknown to us, factory engineers specified a plastic water pump pulley on the 4.4L engine. Whatever the reason, the fact is, plastic does not stand up to the harsh environment found in most engine compartments. As a result, the pulley is prone to failure. Our pulley is aluminum - problem solved.

### Product Description

Part Number PQR000030A is machined from high-strength aluminum that will not succumb to harsh underhood environments. It will not become brittle and crack or disintegrate like the original factory plastic pulley. The pulley is a direct fit bolt-on upgrade - no modifications required.

### Features & Benefits

- Forged from High-Quality Aluminum
- Direct Bolt-on Replacement
- No Adverse Affects from Underhood Temperatures
- 12 Month Warranty
- Also Replaces BMW P/N 11 51 1 742 045 water pump pulley

### Part# & Application

PQR000030A - Range Rover 4.4L 2003-2005: Aluminum Water Pump Pulley Upgrade
