

Land Rover Reconditioned Fuel Tanks

We would like to present to you a great alternative to tank replacement. Why purchase a new tank when reconditioned tanks are available at a fraction of the cost.

Product Description

Reconditioned tanks are all taken through several steps to meet or exceed OE specifications. Each tank is cleaned and stripped of any corrosion. It is then repaired of any holes or cracks. The final step includes sealing the tank inside and out with patented sealants to ensure extra protection.

If you do not see the tank you need, we can recondition yours in most cases. Please contact us for more information.

Features & Benefits

- Alternative to expensive new tank
- New caliper pistons where necessary
- Not loaded with generic low quality pads
- Pre-tested for working conditions
- 12 month warranty
