

Aftermarket Jaguar XJS Fuel Hose Kit

Black Dog Manufacturing, a division of Motorcars Ltd, offers a complete Fuel Hose Kit, for the Jaguar XJS. The hoses in our Jaguar Fuel Hose Kit are exact replacements for the factory hoses and each hose includes a 1 year 12,000 mile warranty.

The Jaguar XJS's factory fuel hoses become brittle and are prone to leaking over time if not routinely replaced. These hoses are difficult to find as these cars age, due to the fact that Jaguar no longer supplies parts for many of the older Jaguars models.

Having seen countless XJS's come through our shops with worn out fuel hoses, we decided to address the problem ourselves. Our Fuel Hose Kit gives you the opportunity to replace all your return and feed fuel hoses at once, saving you time and money trying to find the hoses and ordering them from multiple vendors. Making your XJS a much safer car to drive.

Features

- Avoid costly engine fires
- Complete kit with hose clamps
- High quality factory spec material construction
- No longer available through the Jaguar factory
- In stock ready to ship
