

Jaguar XJ8 Upper Shock Bushing Kit

Black Dog Manufacturing, a division of Motorcars Ltd, offers a Upper Shock Bushing upgrade kit using polyurethane bushings. Our Jaguar Upper Shock Bushing Kits are exact replacements for the factory bushings and includes a 1 year 12,000 mile warranty.

The Jaguar XJ8's factory upper shock mount bushings are prone to premature failure causing general degradation in suspension stability and unwanted vibration and clatter.

When it comes time to replace the factory shock mount bushings, you'll be surprised to learn that replacement bushings are not available from Jaguar! Instead, customers are forced to buy a complete shock-mount plate assembly at a much higher price.

Why should you have to spend hundreds of extra dollars on an entire assembly when all you need are bushings? That's exactly what we wanted to know, and we've answered the question!

Our new Jaguar Upper Shock Bushing Kit replaces the stock "spongey" bushings with a higher-quality, longer lasting urethane bushing utilizing the existing shock-plate assembly. The added expense and trouble of the factory solution is history.

Features

- Bushings are not available from the factory
- Kit contains 4 heavy-duty urethane bushings
- Easy to Install!
- Fully Tested! Means you can buy with confidence
- In stock and ready to ship

Product Description

Jaguar XJ8 Upper Shock Bushing Kit: replaces stock sponge-type bushings with heavy duty urethane bushings. Each Upper Shock Bushing Kit includes 4 urethane bushings, nuts, washers, and installation instructions. Single kit services both sides.
