

Jaguar XK8 Upper Shock Bushing Kit

Black Dog Manufacturing, a division of Motorcars Ltd, offers a Upper Shock Bushing upgrade kit using polyurethane bushings. Our Jaguar Upper Shock Bushing Kits are exact replacements for the factory bushings and includes a 1 year 12,000 mile warranty.

The Jaguar XK8's factory upper shock mount bushings are prone to premature failure because foam rubber does not stand up well to heat or pressure and degrades over time, causing general degradation in suspension stability and unwanted vibration and clatter.

Having seen a number of XK8's come through our shops with worn out factory upper shock bushings, we decided to address the problem ourselves. Our Jaguar Upper Shock Bushing Kit replaces the stock "spongy" bushings with higher-quality, longer lasting polyurethane bushings. The added expense and trouble of the factory solution is history.

Features

- This product is a **Upgrade** to factory bushings
- Kit utilizes a high quality polyurethane bushing
- Restores "Like New" feel to front end
- Fully Tested! means you can buy with confidence
- Will not affect vehicle ride height

Product Description
