

Transmission Pan Conversion Kit

Black Dog Manufacturing, a division of Motorcars Ltd, offers a Transmission Conversion Kit, for the Land Rover LR3, LR4, Range Rover and Range Rover Sport. The fitting of this kit is far easier than the factory solution and includes 1 year 12,000 mile warranty.

The nightmare of changing the transmission fluid and filter on your Land Rover is now a thing of the past. The factory plastic pan with built in filter requires much labor to replace, including removing the mounts and exhaust just to remove the pan which is a highly time consuming job.

Our transmission conversion kit includes a steel pan and separate filter. Once the fluid has been drained from the transmission simply remove the bolts from the old unit. Cut the old plastic sumps filter tube with a hacksaw. Slide the old sump out and remove the other end of the sawn off filter tube (no removal of mounts or exhaust required).

The new separate filter can then be fitted and the new steel transmission pan slides into place and is bolted up with the new gasket and bolts provided in the kit. Once secure the transmission can be filled as per manufacture's instructions.

Features

- Saves you time on labor
- Converts the pan from plastic to durable steel
- The fitting of this kit is far easier than factory unit
- Kit includes a replaceable filter
- In stock ready to ship

Product Description

This kit includes: Steel transmission pan, pan gasket, transmission filter and all the mounting bolts. Fluid not included.

Part# & Application

LR007474.CON - LR3 05-09, LR4 10-16, R Rover 02-13, R Rover Sport 06-13
